Clients served

You sell the solution.

We provide the engineering resource to deliver it.

ABOUT NEXUS

One team, from first survey to final sign-off

Nexus DMM has over 30 years' experience delivering data centre, network infrastructure, IT relocation and field engineering services throughout the UK and Europe. We work directly with organisations and as a trusted delivery partner to telecoms providers, MSPs, network integrators and multi-site organisations, and give every job the same care, whether it's one data point or a hundred sites.

Our engineers and project managers come from IT and cabling backgrounds and handle every stage of a project and every level of stakeholder: from a single engineer on site to a multi-site roll-out or a complete data centre move.

OUR SERVICES

What we do

Data Centre Services

Rack and stack, equipment installation, relocations, patching, cabling, decommissioning and remote hands in data centres nationwide.

Server, switch, router and firewall installs · cabinet audits

Network Infrastructure

CAT6 and CAT6A structured cabling, fibre installation, splicing and testing, cabinets, containment and network hardware deployment.

Termination, testing and certification · wireless access points

IT Relocations

Office IT moves, server and rack relocations, and disconnection and reconnection, with weekend and out-of-hours moves to avoid disruption.

Pre-move surveys · post-move testing

Field Engineering

A nationwide engineering resource for equipment installation, configuration, swap-outs, remote hands, and site and Wi-Fi surveys.

Fault investigation · asset verification · BT exchange work

FOR TELECOMS PROVIDERS, MSPS & INTEGRATORS

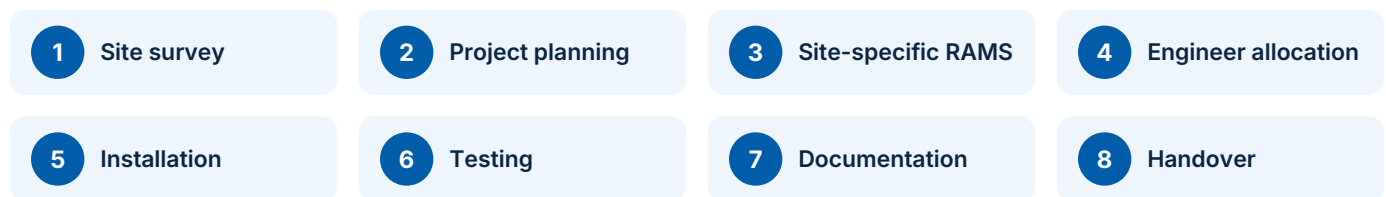

An extension of your delivery team

We help telecoms providers, MSPs and integrators deliver customer solutions without needing to keep all field engineering resource in-house. Nexus DMM provides capacity for peak workloads, specialist cabling requirements, geographic coverage, multi-site deployments, planned migrations and individual remote-hands visits.

When attending your customer's site, our engineers understand that they represent your organisation as well as ours. We prioritise professional site conduct, dependable delivery and clear project communication.

HOW WE WORK

Our delivery approach

WHY NEXUS

Why partner with Nexus DMM?

- ✓ 30+ years of IT infrastructure and engineering experience
- ✓ Trained, competent, CSCS-carded engineers
- ✓ Nationwide coverage, from single site visits to multi-site roll-outs
- ✓ Experience in live data centres, offices, BT exchanges and controlled telecoms locations
- ✓ Weekend and out-of-hours working to keep disruption to a minimum
- ✓ Free site surveys before you commit
- ✓ Practical end-to-end delivery, from first survey to final sign-off
- ✓ A partner-focused service that complements your existing delivery teams

OUR CLIENTS

Trusted by leading organisations

We work with hundreds of clients across the UK and Europe, including:

- Telecoms & managed service providers
- Hotel groups
- Software & technology companies
- High street retailers
- Professional service providers
- Care & retirement homes

“ Their team is reliable, professional and always willing to go the extra mile. ”

ICT Operations Manager, major hotel group
